Things to do beforehand

Talk and discuss with family and friends.

Talk and discuss with everybody about your designated evacuation areas and ways on how to contact each other.

Make the interior of the house Secure and Safe

- ① Stabilize all the furnitures and household appliances in your home to prevent from falling.
- ② Do not put objects in the passages, entrances or exits.

Prepare the emergency supplies in the event of an Emergency Evacuation.

※ Refer to page 3 for the list of things to be prepared in case of emergency evacuation.

Check the designated evacuation area and make a map near your house.

Evacuation centers are schools, community center and civic centers.

※ Refer to page 2 for map making.

To gather informations about the Evacuation centers, access the website of [Fukuokaken Hinanjo Hinanjouhou].

<https://ken-bousai.pref.fukuoka.lg.jp/bousai/index.html?mode=0>

Evacuaton Center

There are provided food in the evacuation centers.

There is a place to sleep.

You will stay together with a lot of people.

Bring your own important things.

Follow the rules.

Help each other

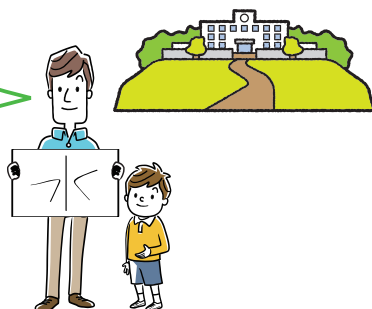

Make a map from your home to the evacuation center.

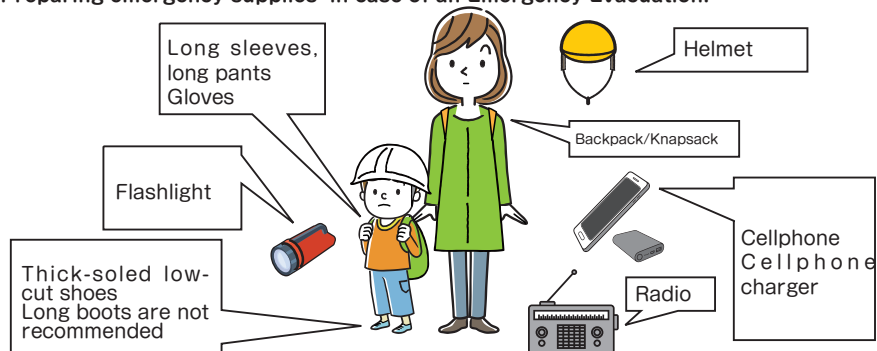

Map

- Check the Hazard map of the town where you live. Actually walk the route.
- Determine a safe route to your nearest evacuation area.

Things to prepare beforehand

Preparing emergency supplies in case of an Emergency Evacuation.

※ There are also other things and supplies needed to be prepared for an emergency evacuation.

Prepare food and water supplies for **3 days** or more.

Food	Water Food Foods that can be eaten as it is and won't spoil such as canned goods, retort, biscuits etc.	Clothes	Clothes (including underwear) Towel Rainwear (umbrella, raincoat) Winter clother

Valuables	Cash, Cashcard, Bankbook, Personal Seal Health Insurance, ID cards Passport		

The things to be prepared depend on the needs of each member of your household. See the list below for some reference.

If there is a pregnant woman	If there are elderly people
Sanitary pads, gauze, antiseptic tissue wipes newly born baby care products, maternal handbook, etc.	Nursing care products, denture and cleaner Adult diapers Medicine box, etc.
If you have a baby  Powdered milk, milk bottle diapers, Maternal handbook, etc.	

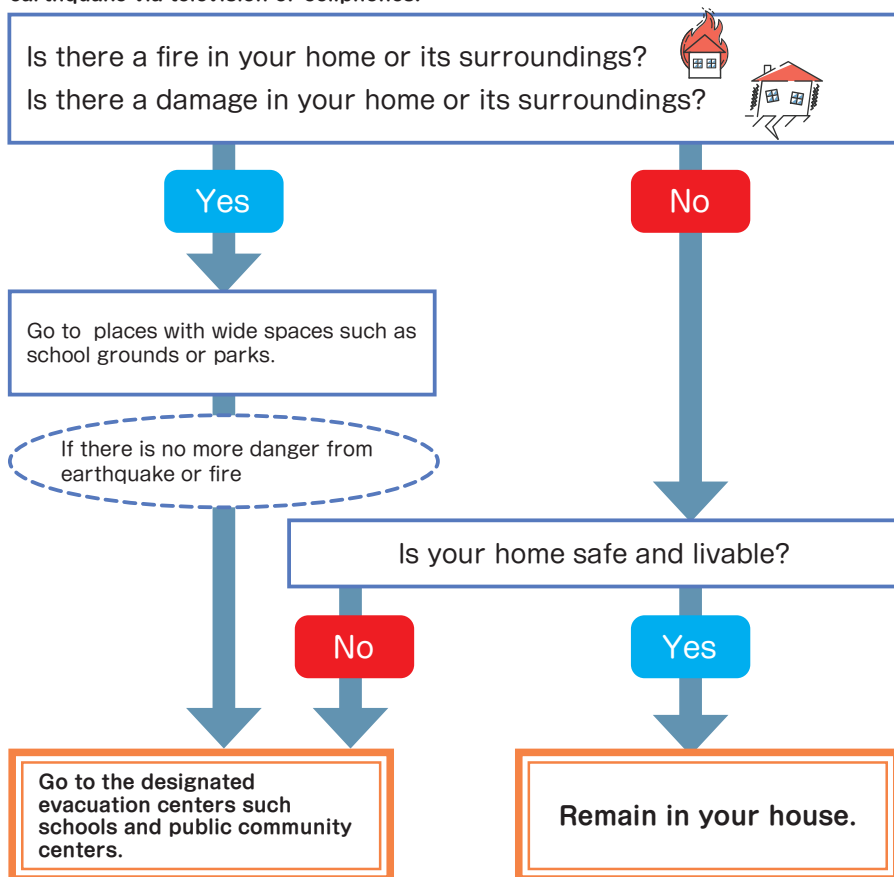

Flow of Evacuation

Refer the flow chart below for evacuation when a disaster occurs while you are at home.

Earthquake

**Occurrence of an earthquake
Secure your own safety first.**

※ Through the Earthquake Early Warning system, people are notified of the incoming earthquake via television or cellphones.

※ Refer to page 6 ~ 9 with regard to earthquake.

Heavy Rains and Typhoons

Heavy Rains and Typhoons is approaching
First, check the latest weather informations
on the news and internet .

Do you receive weather informations such as warnings in your area.

Yes

No

Is there an information
on evacuation
(warning level 3,4,5) ?

No

Continue to check and
gather the latest weather
informations.
Prepare for an immediate
evacuation.

Yes

Is it safe to go to the evacuation center?
E.g. Your home is already flooded with water.
It is evening, you could hardly see the surroundings.

Yes

**Take refuge in safe, tall
buildings with 2 or more
floors. Wait for rescue.**

No

**Evacuate to a safe place
like the Evacuation
center.**

- ※ Refer to page 10、 11 with regard to Heavy rains and typhoon.
- ※ Refer to page 11 with regard to Warning and Alert levels.

About the Earthquake

What is an earthquake?

Japan is a country with numerous earthquakes.

Nobody knows when and where will an earthquake occurs.

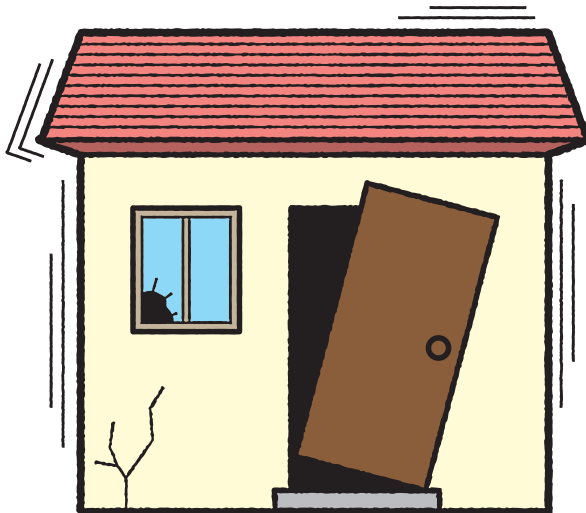

Aftershocks may occur after an earthquake.

The water, electricity and gas supplies might be cut off.

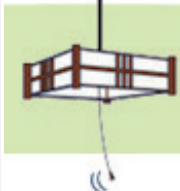

A tsunami might occur especially in places near the seashores.

The ground may shake so hard that houses and buildings might be damaged.

Even if there's an earthquake stay calm.

In Japan, the scale of the shake is represented by a number.

	[Seismic intensity 0] People don't feel the shaking.		[Seismic intensity 5 Lower] Most people try to be safe. Some people find it difficult to move.
	[Seismic intensity 1] Some people inside the room or building feel it.		[Seismic intensity 5 Upper] Most people are extremely frightened and find it hard to move.
	[Seismic intensity 2] Many people inside the room or building feel it. Some people who are sleeping will be awoken.		[Seismic intensity 6 Lower] Difficult to stand.
	[Seismic intensity 3] Felt by most people inside the room or building. Some people are frightened.		[Seismic intensity 6 Upper] Unable to stand and cannot move without crawling.
	[Seismic intensity 4] There is considerable sense of fear. Some people try to be safe. Most people who are sleeping will be awoken.		[Seismic intensity 7] Thrown around by the shaking and unable to move as you like.

Fire and Disaster Management Agency's Disaster Prevention Manual:
Educational material on countermeasures against earthquake disasters

When an Earthquake occurs

Inside the room

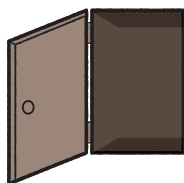

Stay away from bookshelves and windows, and hide under the table.

After the shaking subsides, turn off the fire.

Open the door and secure a way out.

Put on shoes to prevent injury.

During evacuation, bring the Emergency supplies.

※ Refer to page 3 for the list of things to be prepared in case of emergency evacuation.

Confirm the safety of your surroundings first before going out.

Inside the shop

Follow the instructions of the store clerk.

In an elevator

If the elevator does not stop automatically, press the buttons for every floor and get off as soon as the door opens.

On a train or bus

Follow the instructions of the staff, and refrain from rushing out of the door.

Near the Sea

A tsunami might occur, run away to a high place away from the sea.

Near a Building

Buildings might be broken and things will fall so stay away from it.

When driving a vehicle

Pull over the car on the left side of the road and stop the engine.

Leave the key in the ignition and evacuate.

Near a Mountain

Evacuate to a safe place as a mountain or a cliff may collapse.

About the Heavy Rain and Typhoon

What is Heavy Rain, Typhoon?

Heavy Rains

Heavy Rains mean more rain will fall than usual.

Heavy rains occur during the rainy season (June to July) and during typhoons.

The water level of the rivers may rise and overflow.

Roads may overflow with water and it may enter the houses.

The cliffs may collapse.

Typhoon

Typhoons mostly occur from July to September.

It will rain heavily and strong winds will occur.

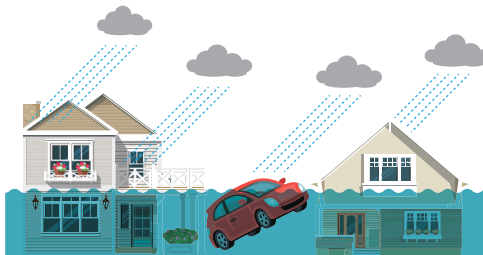

The water level of the rivers may rise and overflow.

The sea may be rough and the waves will rise.

The operations of trains, buses, and subways may stop.

The billboards and roof tiles may be blown away because of the strong winds.

※ Heavy rains and typhoons can be predicted. Make it a habit to always check the internet and the television for the latest weather news updates.

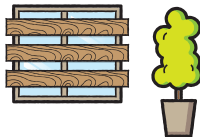

When Heavy Rain or Typhoon occurs

Always check the television and internet for the latest news.

Prepare the Outside of the House

Secure everything that might be blown away.

Shut all the windows and shutters.

Prepare the necessary things in case of Evacuation.

※ Refer to page 3 for the things to be prepared in case of evacuation.

Stay away from dangerous places.

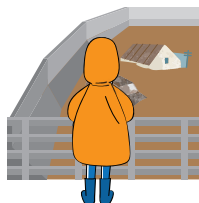

Dangerous places may include rivers, seashores and mountain slopes.

Landslides may occur.

Heavy rains and Typhoon may cause the soil to soften.

Cliffs may collapse.

People living in houses near cliffs should evacuate immediately.

Warning Levels and Proper Actions to Take

Warning Level	Actions to Take	
1	Heavy rains might occur. Check the latest news carefully through the television and internet.	
2	Prepare to evacuate. Check the hazard map.	
3	Healthy and able persons prepare for evacuation. Elderly and expectant mothers should evacuate.	
4	Everyone should evacuate to a safe place.	
5	Life is in danger. Take measures to protect life.	

Fire

When a fire occurs

1. Let the people around you know by shouting [KAJI DA] (there's a fire).

Residential Fire Alarm

A device that produces a loud noise when it detects smoke and heat.

2. Contact the fire department by dialing 119. (free of charge)

How to contact 119

- ① Dial 119 and clearly say [kaji desu] "Fire"
- ② Tell the location . OO ward, OO block , the house number OO mansion , next to the OO community center. [Ooku OOchoume Ooban, Oogo; OO mansion, OO no tonari desu]
- ③ OO is burning. [OO ga moeteimasu].
- ④ My name is. [Watashi no namae wa OO desu].
My phone number is. [Denwa bangou wa 000-0000 desu].

3. Put out the fire with fire extinguisher or water.

If you don't have a fire extinguisher, put out the fire by beating it with a cushion or by covering the flames with a wet towel or blanket.

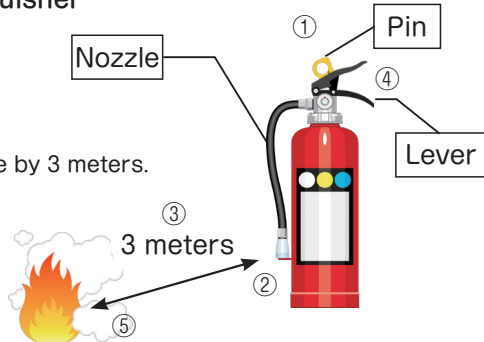

Never water the pans that has oil in it, kerosene stoves and electrical appliances.

How to use the fire extinguisher

- ① Pull out the pin.
- ▼
- ② Hold the end of the nozzle.
- ▼
- ③ Distance yourself from the fire by 3 meters.
- ▼
- ④ Squeeze the lever tightly.
- ▼
- ⑤ Aim and spray the nozzle at the base of the fire.

4. Evacuate immediately when you fail to extinguish the fire.

Make sure not to inhale the smoke from the fire when evacuating.

The smoke from the fire contains hazardous chemicals or gas.

Cover your mouth and nose with a wet towel or wet handkerchief. Posture yourself low and evacuate.

Always use the stairs when evacuating from tall buildings (mansions and department stores).

Never use the elevators,

5. You must not go back once you are already outside.

Preventing a fire.

Do not leave anything that easily catches fire around the house.

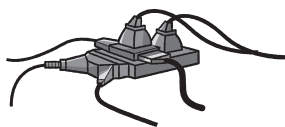

When you leave the kitchen, turn off the fire.

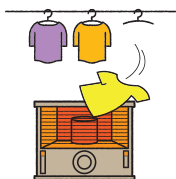

After smoking a cigarette, extinguish it properly.

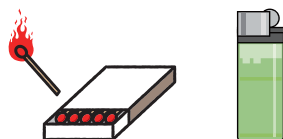

Do not connect a lot of electrical appliances to one outlet.

Do not leave things that easily catches fire near the stove.

Do not place matches or lighters where children can reach them.
